

## Primary Care Referral Toolkit

Healthier You is an evidence-based lifestyle change programme which helps people at high risk of type 2 diabetes to reduce their risk through managing their weight, eating more healthily and being more physically active.

The service is delivered by Reed Wellbeing in Greater Manchester. The sessions can be attended face-to-face at a local venue, on Microsoft Teams or on the phone via a digital app. People will be able to choose their preferred option.

By reading this guide you will understand:

- How to generate income with the Healthier You programme
- Who is eligible
- How the programme is delivered
- How to make a referral
- How to bulk invite people to the programme using text messages
- Where to access additional resources

Can my practice generate income with the Healthier You programme?

There are a number of ways to earn income for your practice through case finding and referring people to Healthier You

Health Checks	QOF Non-diabetic hyperglycaemia	Weight Management Enhanced Service
<ul style="list-style-type: none"><li>Income from Health Checks</li><li>Based on locally commissioned contracts and may vary from one commissioning area to another</li></ul>	<ul style="list-style-type: none"><li>NDH002. The percentage of patients with non-diabetic hyperglycaemia who have had an HbA1c or fasting blood glucose performed in the preceding 12 months</li><li><a href="#">Quality and Outcomes Framework guidance for 2025/26</a></li></ul>	<ul style="list-style-type: none"><li>Practices will be entitled to £11.50 for referrals to the programme that meet the requirement of the Weight Management Enhanced Service Specification</li><li><a href="#">Enhanced service specification: weight management programme 2025/26</a></li></ul>

## Who is eligible?

People who have a diagnosis of non-diabetic hyperglycaemia (NDH) and women with a previous diagnosis of gestational diabetes are eligible for the programme

### Women with previous gestational diabetes

- Adults aged 18+
- A previous diagnosis of gestational diabetes
- No diabetes diagnosis

### Non-diabetic hyperglycaemia

- Adults aged 18+
- Blood glucose level that indicates NDH (HbA1c 42 – 47 mmol/mol; FPG 5.5 – 6.9 mmol/l) in the past 12 months
- No diabetes diagnosis
- Not pregnant

## How is the programme delivered?

There are 3 ways to take part in the programme:

### Face-to-Face

13 friendly and supportive group-based sessions over 9 months with a trained Health Coach

### Digital

Accessed on your phone or online using the Reed app, plus regular contact from a Health Coach

### Remote

In online video session with a Health Coach for people who need additional support with access including: visually impaired, hearing impaired, people who speak Urdu, Punjabi, Bengali, Pashto and Gujarati and women with previous gestational diabetes

Visit [Reed Wellbeing About the Programme](#) for more information on delivery methods and what is included in the sessions

## How do I make a referral?

You can make a referral using the referral form on your clinical system.

It is called **GM NDPP Referral Form Reed Wellbeing - v06-07-2022**

- Patient information is set up to auto populate
- Complete the additional fields and send to Reed at [greater.manchester@nhs.net](mailto:greater.manchester@nhs.net)
- Reed will contact the person and book them onto the programme
- You will receive updates from Reed when people start and complete or drop out of the programme including the SNOMED codes to add to their record

**Referral Form**

**To be eligible for the programme, the person must be aged 18+ and:**

- Be registered to a **Greater Manchester** GP Practice (by postcode)
- Have an HbA1c of 42-47 mmol/mol (6.0-6.4%) or an FPG of 5.5-6.9 mmol/l tested in the last 12 months.
- Not have been diagnosed with Type 2 Diabetes.
- Not be pregnant at the time of referral.
- Be able to participate in NHS Diabetes Prevention Programme.
- If Participant has a Previous Diagnosis of GDM – They are eligible with a HbA1c < 42 mmol/mol or FPG < 5.5 mmol/l tested within the last 12 months.

Where the patient is 80+ years – Please tick the following box to provide written confirmation that you consider the benefits of the programme outweigh any potential risks associated with weight loss for the individual

June 2022 | v1.0

## Is there a way to bulk invite people to the programme?

Bulk invites offer an effective way to catch up on people who may not have received a referral.

Searches are available on clinical systems to identify eligible participants. Patient lists generated from these searches can be uploaded into your text messaging system, enabling you to send bulk invitations.

## Where can I find the programme searches?

1. Click on the EMIS Ball
2. Click Reporting, Population Reporting
3. Locate your Data Quality Folder on the Left

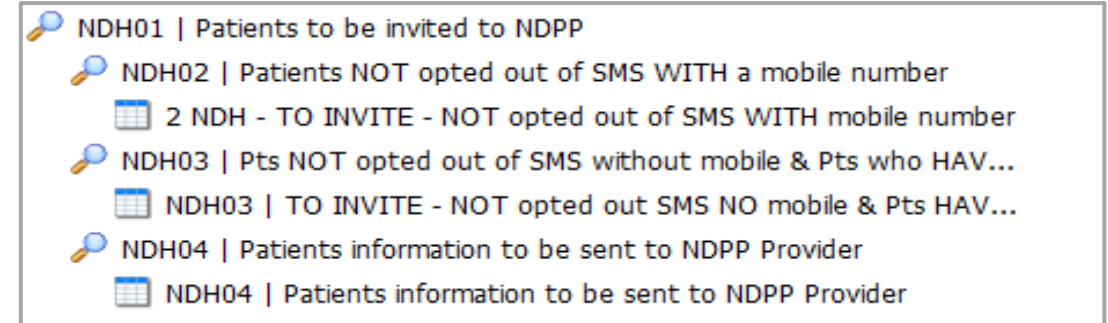

4. Right Click and Run folder 02 | NDPP

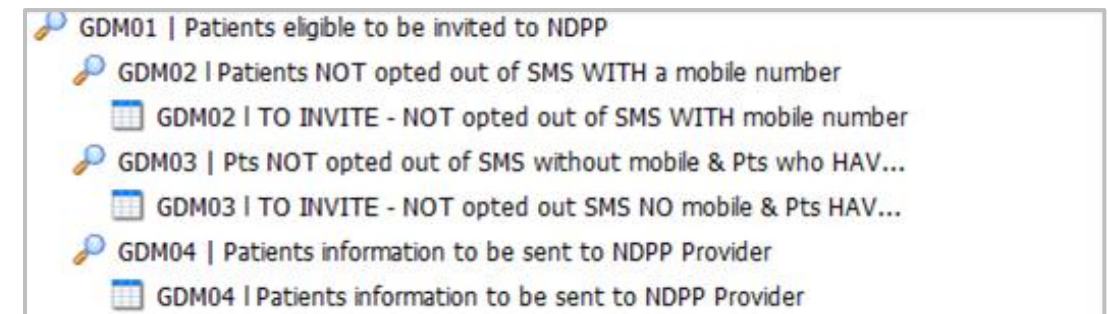

In the eligible invites folder:

**NDH01 Patients to be invited to NDPP** will provide you with a list of people who have had a HbA1c indicating NDH in the past 12 months

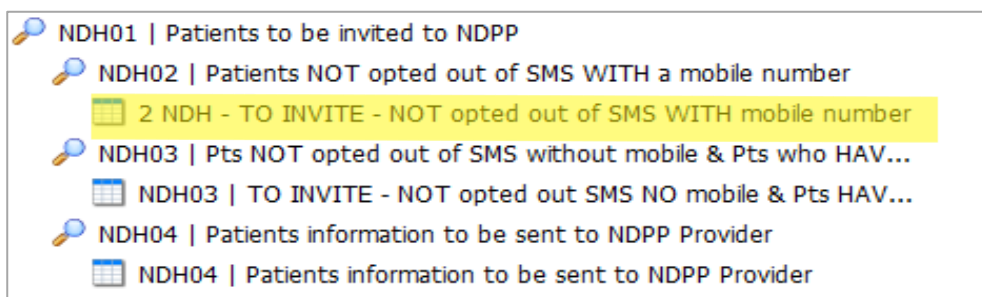

**GDM01 Patients eligible to be invited to NDPP** will provide you with a list of people who have previous gestational diabetes

## Inviting people with non-diabetic hyperglycaemia to the programme with personalised bulk text message

If **personalised bulk text messaging is available** through your messaging service provider you can include the person's HbA1c result and test date on the text. People can then register themselves for the programme by contacting Reed by phone or using the online referral form.

In the eligible invites folder download the results of search **NDH02 Patients NOT opted out of SMS WITH a mobile number**. This will provide you with a list of people and their mobile number who can be sent a text invite to them programme.

All the practice is required to do is:

- Send the text below to the non-diabetic hyperglycaemia list
- Reed will contact the person to book them onto the programme

Dear [Patient]

Your GP reviewed your latest blood test and found your blood sugar levels are higher than normal. This means you're more likely to develop type 2 diabetes in the future.

The FREE NHS Healthier You Programme provides life changing support to people to reduce their risk. Watch a short video for more information on the programme [here](#).

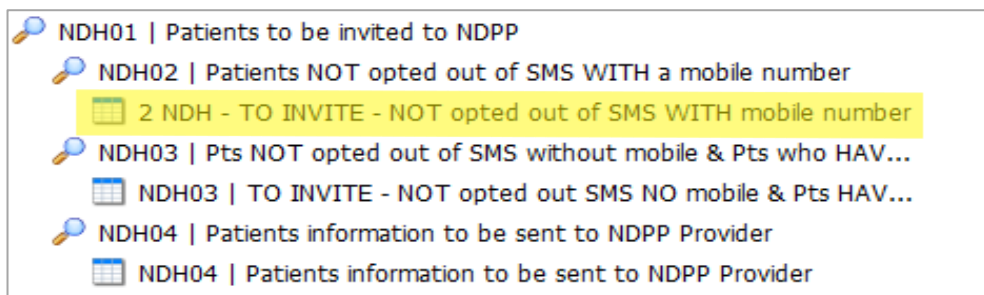

Sign-up completing the [online referral](#) form or call the Reed Wellbeing support line on 0800 092 1191. You will need the following details: Your NHS number [NHS number], HbA1c [HbA1c result] & test date [HbA1c date]

Kind Regards, [GP & Practice Name]

## Inviting people with non-diabetic hyperglycaemia to the programme with non-personalised bulk text message

If **personalised bulk messages is NOT available** through your messaging service provider people can be asked to consent to a referral and the practice is required to make the referral on their behalf.

In the eligible invites folder download the results of search **NDH02 Patients NOT opted out of SMS WITH a mobile number**. This will provide you with a list of people and their mobile number who can be sent a text invite to the programme.

Practices are required to :

- Send the text below to the non-diabetic hyperglycaemia list
- Monitor the text message inbox and refer people who opt in to Reed using the referral form
- Reed will contact the person to book them onto the programme

Dear [Patient]

Your GP reviewed your latest blood test and found your blood sugar levels are higher than normal. This means you're more likely to develop type 2 diabetes in the future.

The FREE NHS Healthier You Programme provides life changing support to people to reduce their risk. Watch a short video for more information on the programme [here](#).

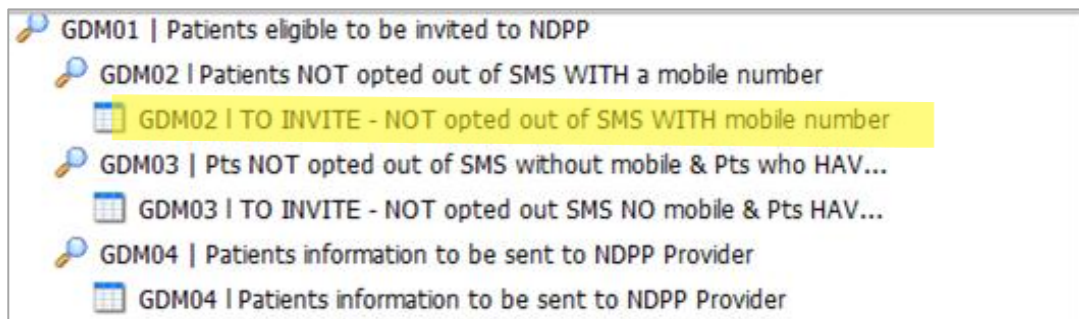

If you'd like to join the programme reply YES to this message and we will arrange a referral for you.

Kind Regards, [GP & Practice Name]

## Inviting women with previous gestational diabetes to the programme by text

Women who have previously had Gestational Diabetes do not require an HbA1c result and can be invited to self-refer to the programme using Reed's online referral form.

In the eligible invites folder download the results of search **GDM02 Patients NOT opted out of SMS WITH a mobile number**. This will provide you with a list of people and their mobile number who can be sent a text invite to the programme.

Practices are required to:

- Send the text below which includes the link to the online self-referral form to the gestational diabetes list
- Reed will contact the person to book them onto the programme

Dear [Patient]

Your GP having reviewed your record has found that you had Gestational Diabetes (GDM) in the past. This means you're more likely to develop type 2 diabetes.

The FREE NHS Healthier You Programme provides life changing support to people to reduce their risk. View our leaflet [here](#) for more information about the programme.

Sign-up by completing the [online referral form](#) or call the Reed Wellbeing support line on 0800 092 1191. You will need to have your NHS number to hand

Kind Regards, [GP & Practice Name]
