

FreeStyle Libre

FOR HEALTHCARE PROFESSIONALS

Dear Diabetes Lead,

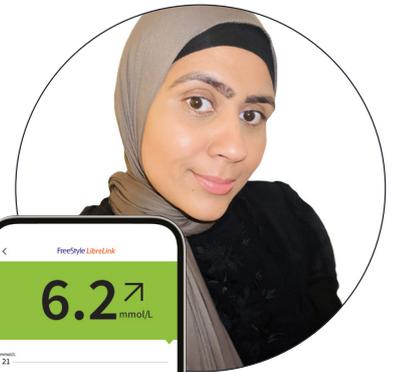

I hope this letter finds you well. My name is **Asia**, and I am your local representative supporting Greater Manchester ICB with the implementation of FreeStyle Libre systems.

As you may be aware, Greater Manchester ICB has recently expanded access to continuous glucose monitoring (CGM) for all patients living with type 1 diabetes, and for those patients with type 2 diabetes who are managed with insulin and who meet the GMMMG criteria (scan the QR code below for details). The guidance covers the use of FreeStyle Libre in primary care without the need to refer to secondary care.

Click the QR code to read the full guidance or visit gmmmg.nhs.uk/guidance/medicine-and-device-recommendations

We are pleased to see that your local policy now aligns with these updates, allowing your patients to benefit from this life-changing technology.

How can we support you?

I would like to extend the **offer of comprehensive training for you and your practice** in the use of FreeStyle Libre technology. Additionally, I would be pleased to arrange a **personal trial** of the Libre 2 Plus sensor for you, should you wish to gain first-hand experience with the system.

We can provide you with **Starter Kits** to get your patients started – their first 15-day sensor is free, with subsequent sensors available on prescription.

We can **deliver training** for your Practice staff and any other Healthcare Professional Teams helping to manage your patients with diabetes, such as District Nurse Teams and Care Home Staff.

We have product information available in **different languages** (ask us for printed versions or find them online at freestyle.abbott/uk-en/support/accessibility).

Face-to-face training is also available for patients in the form of group starts, delivered by our Patient Training Team.

We can **connect you to LibreView**¹, giving you secure access to your patients' glucose data and supporting more efficient reviews. LibreView now integrates with EMIS, giving Practices the option of saving patients' data into their medical record.

Medical Educator Support is available from our Diabetes Specialist Nurse, Jody Foster, who can **provide advice and guidance** for swift and efficient patient consultations with CGM.

We have **online training sessions for patients** – scan the QR code and send them the link so they can join us LIVE.

0800 170 1177 is our **free Customer Care Helpline** for all patient queries and questions, including issues with their sensor (open Monday to Friday 8am–8pm and 9am–5pm Saturday, Sundays and bank holidays).

Kind Regards,
Asia
